

## **STATEMENT OF PURPOSE**

### **RS23582**

Amendments to Section 33-320, Idaho Code, will add clarifying language and additional emphasis on the continuous improvement aspects of the required planning rather than a traditional strategic planning process. Based on questions received from school districts and some of the strategic plans that were approved by local boards of trustees it was determined that additional clarifying language would be helpful for districts to better understand the original intent. Additionally, the reimbursement amount would be increased to six thousand six hundred dollars (\$6,600) and the date the plans are required to be posted has been moved to October 1.

### **FISCAL NOTE**

The changes clarify the original intent of the legislation and increase the fiscal impact by approximately \$752,000.
